BISON/ARCGUARD HIGH RISK QUICK REFERENCE GUIDE

When it comes to Safety and Standards we don't just comply, we certify! Every safety design and batch of fabric we use is certified at reputable test houses around the world. We will not let production commence unless we have positive test results and pass certification. Certification is available on request.

ARCGUARD INHERATEX WORKWEAR INHERENT FR / ANTISTATIC / ATPV (CAL) RATING

Arcguard Inheratex is a blended Inherent FR fabric which offers uncompromising Flame Resistance, Arc Protection and Antistatic protection. Inheratex has inherent flame retardant properties which will not deteriorate or diminish; they are literally a structural part of the fibre. Inheratex fabric is soft, strong, and resilient, made from fibres that can be easily dyed, with good shape retention and quick drying. Inheratex is non-allergenic and has resistance to chemicals and solvents.

STAY DRY FOR 6HRS IN OUR ARCGUARD RAINWEAR!

Arcguard Rainwear with 300D Poly Oxford, Antistatic carbon grid, Modacrylic liner and FR cotton lining has a 16,000+mm waterproof rating and comes with our 6hr Waterproof Guarantee.

INHERENT VS TREATED FABRIC FR?

Inherent fabrics such as our Arcguard Inheratex and InheraLite contain
inherent FR fibres which mean they do not wash out - the FR properties are
built into the fibre and are there for the life of the garment. Treated fabrics
are chemically treated to provide FR properties and this means that these
FR properties will wash out over time (typically 50 washes).
