

RESPIRATORY PROTECTION

Force® Typhoon™ 10 RX Modular Prescription Kit

AST000-000-000

DESCRIPTION

The RX Modular Prescription Kit enables the use of corrective lenses with the Force® Typhoon™ 10 respirator, preventing traditional prescription spectacles interrupting the face seal and compromising protection. The RX insert can be taken to a high street optician to be glazed with your relevant prescription. It can be easily removed for cleaning and maintenance, or to be used in a new / pool mask or different product.
